

BMAD AI Engineering Workflow

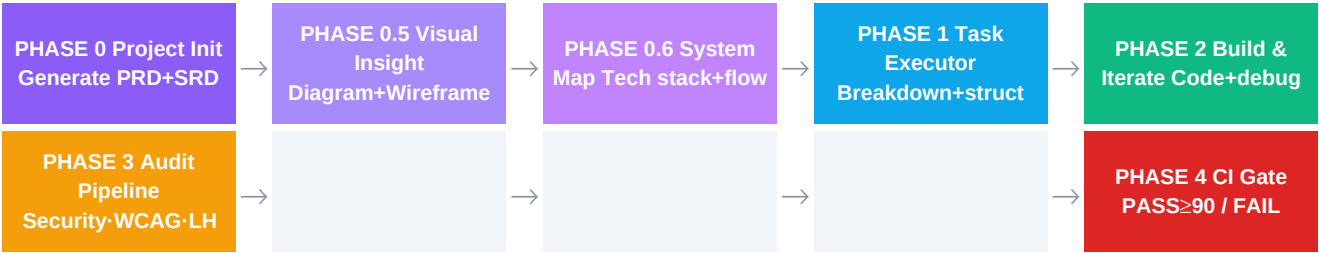

Security · Accessibility · Performance — Pipeline Guide v2

Cara Mulai (Baca Ini Dulu)

■■ AGENTS.md dan system-prompt.md tidak perlu diupload — sudah di-merge ke dalam bmad-main.md.

Skenario	Upload ke Claude.ai	Ketik ini
Punya ide, brainstorming	bmad-main.md SYSTEM_MAP.md	"Saya punya ide: [ceritain] Jalankan PHASE 0"
Project baru, siap build	Semua file /ai/ + /docs/ + SYSTEM_MAP.md	"Jalankan project-init"
Mau coding sekarang	PRD.md + SRD.md + task-executor.md	"Jalankan PHASE 1: task-executor"
Review / debug kode	auto-code-review.md atau bug-hunter.md + kode	"Jalankan PHASE 2: review kode ini"
Siap deploy	Semua file + kode final	"Jalankan PHASE 3: full audit"

Pipeline Flowchart

Resource Rules

Resource	Kapan Dipakai	Prioritas
lean-ctx	Default selalu — compress context, jangan dump raw	SELALU
SYSTEM_MAP.md	Sebelum kerja menyentuh arsitektur, flow, atau multi-file	WAJIB
bmad-main.md	Behavior, coding discipline, safety, MCP rules — include AGENTS	WAJIB
MCP you.com	Butuh data external, research, referensi terkini	Jika perlu
Basic agent	Fallback kalau you.com quota habis	Fallback
Output style	Caveman — direct, no fluff, siap pakai	SELALU

File Function Reference

■ ■ AGENTS.md dan system-prompt.md sudah di-merge ke dalam bmad-main.md. Tidak perlu diupload sebagai file terpisah.

File	Fungsi Utama	Kapan	Phase
bmad-main.md	Entry point + navigasi semua phase, agent behavior, MCP rules, coding discipline, safety — include semua isi AGENTS.md	Setiap sesi — upload pertama	ENTRY
project-init.md	Onboarding: tanya 6 pertanyaan, generate PRD + SRD	Sekali — project baru	P0
SYSTEM_MAP.md	Arsitektur navigation map: entrypoints, flow, boundaries, token efficiency	Isi di P0.6, update tiap ada perubahan	P0.6
task-executor.md	Konversi PRD + SRD jadi tasks, file structure, urutan implementasi	Setelah PRD+SRD+SYSTEM_MAP terisi	P1
auto-code-review.md	Review kode: bug, bad practice, performance, security, UX logic	Saat coding — paste kode	P2
bug-hunter.md	Debug specialist: root cause analysis + fix presisi	Saat ada error / unexpected behavior	P2
auto-security-agent.md	Pipeline audit: security scan, WCAG, Lighthouse, CI gate	Sebelum deploy — wajib	P3-4
PRD.md	Product req: problem, users, fitur, flow — diisi via project-init	Source of truth semua agent	DOCS
SRD.md	System req: stack, arsitektur, API, schema — diisi via project-init	Source of truth teknis	DOCS
audit-checklist.md	Checklist manual: accessibility, UX, layout, code quality, security	Review akhir sebelum finalisasi	P3
accessibility-wcag.md	Panduan WCAG 2.1 AA: POUR principles, checklist, severity, tools	Referensi audit aksesibilitas	P3
mcp.json	Local MCP server registry untuk workspace	Konfigurasi — tidak diubah tiap sesi	CONFIG

Context Files per Sesi

Skenario	File yang diupload
Setiap sesi (wajib)	bmad-main.md · SYSTEM_MAP.md
Project baru (P0)	bmad-main.md · SYSTEM_MAP.md · project-init.md
Coding (P1-2)	bmad-main.md · SYSTEM_MAP.md · PRD.md · SRD.md · task-executor.md
Audit (P3-4)	bmad-main.md · SYSTEM_MAP.md · PRD.md · SRD.md · auto-security-agent.md · audit-checklist.md · accessibility-wcag.md · kode final
